Ingenico iPP320
Compact and Secure

So Much More than a PIN Pad

Easy to Use
- Sleek, ergonomic design occupies minimal counter space and provides easy handling
- Illuminated keypad results in fewer customer input errors

Efficient and Secure
- Supports latest security standards for PIN-based transactions
- Contactless capabilities provide customers a convenient way to pay with chip cards, key fobs or mobile wallets
- Ready for the future of EMV chip card technology

Benefits at a Glance
- Built with highest security standards in the industry
- Illuminated, backlit keypad results in fewer customer errors
- Ready for EMV chip cards
- Contactless payment capabilities
- Compact hand-over design

The Ingenico iPP320 PINpad provides the perfect solution for processing PIN-based transactions. It easily connects to the iCT250 countertop terminal as a customer-facing PINpad and is ready for the future of secure EMV “chip” cards, protecting you and your customers from counterfeit card fraud. The iPP320 also has integrated Contactless technology that extends the convenience of “tap and go” payments and prepares you for the acceptance of mobile wallets. Its sleek ergonomic design and illuminated backlit keypad make it easy for your customers to use.
